ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite):

The site is 51 acres in size and is forested.

There is an isolated wetland on the site which is 0.10 acre in size. The isolated wetland is a non-navigable, intrastate, isolated wetland. The isolated wetland is forested, relatively small in size, closed in nature, and has insufficient hydrology to support navigation. There is no evidence that the isolated wetland is or could be used for interstate or foreign commercial purposes. The isolated wetland has no surface water connection to other waters of the United States, but is located approximately 2000 linear feet from the nearest tributary water of the United States.

The site does not contain waters of the United States.
